Iron Water Filtration

ProMate 6.0-IC Jr

A CHEMICAL FREE OPTION FOR IRON & SULFUR/ROTTEN EGG ODOR

IRON CURTAIN[®] JR
SYSTEM

Iron Water Filtration: ProMate 6.0-IC Jr

How Iron Enters Your Home

Iron is one of the earth's most plentiful elements, making up at least 5% of the earth's surface. As rainwater makes its way through the ground and into our waterways, it dissolves and collects minerals like iron along the way. Excess iron is found most often in wells, but can also enter your home through poorly filtered municipal water systems or aging pipes and plumbing. Left unfiltered, iron can cause water to have a metallic taste, rotten egg smell and create hard-to-remove rust stains on household fixtures and appliances.

Benefits of ProMate 6.0-IC Jr Iron Water Filtration

-  Eliminates rust stains in the bathroom, kitchen and laundry, saving you time and money on cleaning
-  Clothing will be brighter, whiter and last longer
-  Lengthens the life of water-using appliances and fixtures
-  Water-using appliances and fixtures stay cleaner longer, reducing the need for frequent cleaning
-  Lengthens the life of your water softener and drinking water systems
-  Reduces need for hazardous chemicals in the home, avoiding damage to plants and animals

ProMate 6.0-IC Jr Reduces:

- Iron
- Sulfur
- Manganese
- Rotten egg smell

It's clear. Getting rid of excess iron in your home's water makes a big difference all around the house—and for everyone in it.

ProMate 6.0-IC Jr

ONLY THE BEST WATER GETS PAST THE PROMATE 6.0-IC JR

The Iron Curtain Junior system is the chemical-free alternative for removing iron, sulfur odor and manganese. Separate regeneration cycles allows for full backwash & air regeneration to improve performance and cleanse your water.

SYSTEM FEATURES:

- 💧 Digital display with user-friendly electronics
- 💧 Fewer parts to service
- 💧 On-demand regeneration based upon water usage
- 💧 Backwashes only when needed.
- 💧 Back-lit display makes it easy to read, and alerts you of system notifications
- 💧 Corrosion-resistant control valve, body and tanks for a longer life
- 💧 All internal components are lead-free

HERE'S HOW IT WORKS

Forcing untreated water through a layer of oxygen converting iron and manganese into larger particles that are filtered out as water moves through the filter bed. During the regeneration cycle, trapped particles are flushed to drain and the layer of oxygen is replenished.

ProMate 6.0-IC Jr

No hazardous, expensive chemicals

- Low-cost operation
- Environmentally safe for septic systems
- No harm to plants and pets

Ecologically friendly

- The Iron Curtain Jr is a green technology

Produces highly oxygenated water

- Free from odor
- Free from problem-causing rust

Minimal pressure loss

- Custom designs for larger homes
- High-flow control valve

Self-diagnostic software

- Informs you of flow rates, operation sequence, time and maintenance schedule
- Displays local service provider's phone number
